

Smile Recruitment Portal — User Manual

For HR users, organisation owners and everyone else who uses the portal. Version: October 2026.

This manual describes the portal as it works today. If something on your screen looks different, or a menu item described here is missing, your account probably has different access. Ask your organisation owner or contact support (see [Section J](#)).

Contents

A. Quick start

What the portal is for

The Recruitment Portal keeps a hire in one place, from the moment a role is needed to the final interview:

- You create a **role** (the job you are hiring for).
- Candidates apply, or you upload their resumes.
- **Smile**, the portal's AI assistant, reads each resume and scores it against the role.
- Candidates you choose do a short **AI interview**: a phone call with Smile (**Voice Interview**) or a video interview with Smile (**Live Avatar Interview**).
- You review the evidence and decide who moves on to a **face-to-face interview** with your team.

Smile's scores and summaries help you decide faster. They are never the decision: a person in your team always approves or rejects.

The main workflow in one line

Create role → Add applicants → Smile screens resumes → You approve → AI interview → You review → Face-to-face interview → Final decision.

Where to begin

1. Sign in. A new organisation sees a **Getting Started** card on the **Dashboard** listing the setup steps, with a button for each.
2. Make sure you have **Smile Credits** (see [Section I](#)). New organisations normally start with free welcome credits; you can also redeem a promo code or buy more.
3. Create your first role: **Role Requests** → **Create Role Request**.
4. Add candidates: share the role's application link, or upload resumes in **Resume Screening**.
5. Review applicants in **Applicants**.

Need help at any point? Select the smiling blue robot in the bottom-right corner of any page.

B. User types

What you see depends on your access. Menu items and buttons you cannot use are hidden.

User type	Who it is	What they can do
Organisation Owner	The first person from your company to register.	Everything an HR User can do, plus invite teammates and deactivate or reactivate colleagues.
HR User	Everyone else who registers with your company email.	Create and manage roles, screen resumes, review applicants, send interviews, use the Interview Calendar, change Settings, redeem promo codes and buy credits.
Credits Admin	An account given credits-only access.	View and manage Smile Credits. No recruitment access.
Role Requester	Someone who can only request roles (if your organisation uses this).	Submit role requests and follow their own requests. Their requests go to HR for approval.

User type	Who it is	What they can do
Department Head	Read-only access for one department (if used).	See their department's roles and applicants. No changes.
Management	Approval access (if used).	Approve or reject role requests and view records. Does not use HR tools.

McLink, the portal provider, has **McLink administrators** who can manage organisations, add credits manually and create promo codes. You will not see these tools.

In most client organisations everyone is an **HR User**, and the first person is also the **Organisation Owner**.

C. Navigation overview

The menu is on the left (on a phone, select **Menu** at the top). Your Smile Credits balance is shown at the top of the menu.

Menu item	What it is for
Dashboard	Your starting page: what needs attention, key numbers, upcoming interviews and recent activity.
Role Requests	Create and manage roles (jobs you are hiring for).
Resume Screening	Upload resumes in bulk, import from Google Drive or OneDrive, screen one resume, or email a candidate an application link.
Applicants	Every candidate, their scores, interviews and history. A number badge shows new applicants.
Interview Calendar	All scheduled interviews by month; add an extra face-to-face time.
Settings	Your organisation's branding, calendar connection, recording storage and automated emails.
Credits	Your credit balance and history, buy credits and redeem promo codes.
User Accounts	Your team: who has access, invitations (owner only).
Profile	Select your name at the bottom of the menu: your account details and your own Google Calendar.

Also on every page:

- **The bell** (top right): new applicants since you last looked.
- **The Smile robot** (bottom right): the Smile help assistant and the **Help & Feedback** tab.

There is no separate Reports page. See [Section L](#) for exports.

D. Dashboard

The Dashboard refreshes by itself about every 30 seconds.

Getting Started (new organisations)

Shown to HR users until setup is complete. It shows how many required steps are done ("x of y required") and a button for each step:

- **Review organization name and branding** (optional)
- **Add Smile Credits** (required)
- **Configure Google Drive for Live Avatar recordings** (needed for Live Avatar interviews)
- **Connect Google Calendar** (needed only for face-to-face interviews)
- **Create and publish your first role** (required)
- **Add candidates**
- **Invite teammates** (optional)
- **Customize automated emails** (optional)

What Needs Your Attention

The items waiting for you, each with a count:

Card	Meaning
Role reviews	Role requests waiting for HR review.
Resume reviews	Candidates whose resume is waiting for your decision.
Voice reviews	Completed phone interviews to review.
Avatar reviews	Completed Live Avatar interviews to review.
Open alerts	Problems that need someone to follow up (see Section M).

A card shows **Needs action** when its count is above zero and **Clear** when there is nothing to do. Select a card to go to the matching list.

Recruitment Overview

Your key numbers, for example **Role requests**, **Approved requests**, **Open positions** (roles accepting candidates), **Applications**, **Hiring decisions** (candidates waiting for a decision) and **Upcoming interviews**. It also shows how applications are spread across the hiring stages (Resume Review, Resume Approved, Interview Choice Pending, Voice Interview, Live Avatar Interview, Face-to-Face Interview, Final Decision).

Upcoming Interviews and Recent Activity

The next scheduled interviews, and the latest changes across your roles and applicants. Select **View details** to open one.

Actionable Alerts

The current alerts, each with a button that takes you to the fix. When there are none you see "No issues need your attention right now."

Shortcut

Create Role Request starts a new role.

E. Role Requests

A **role** is a job you are hiring for. Open **Role Requests** to see **Submitted Requests**, with search, a status filter, sorting and **Export to Excel**.

Create a role

1. Select **Create Role Request**.
2. Save time: upload the job description (PDF, DOC or DOCX) or paste it into **Job Description**, then select **Generate draft** (or **Generate AI questions**). Smile fills in the screening criteria and interview questions. **Always read and correct what Smile fills in.**
3. Complete the **Role request** section.
4. Choose the **Interview Type** (see below).
5. Complete **Screening and Interview** (HR users).
6. Select **Create role**. The role is approved and published, and its application link is ready to share. Or select **Save as draft** to finish later. The form also saves drafts automatically while you type.

Role Requesters see **Submit for HR approval** instead; HR then approves or rejects the request.

Required fields

Field	Notes
Job Description	At least 20 characters.
Request Type	Staff Addition or Staff Replacement.
Employee or Position Being Replaced	Only for Staff Replacement.
Job Title	For example "Inside Sales Specialist".

Field	Notes
Department	Choose from the list.
Employment Type	Full-Time, Part-Time, Contract, Temporary or Internship.
Number of Vacancies	1 to 100.
Target Hiring Date	Today or later.
Reason for Request	Why the role is needed.
Interview Type	Voice Interview only, Avatar Interview only, or Both.
Screening criteria	What a strong candidate looks like (HR form).
Salary visibility	Disclosed or Not disclosed (HR form).
License or certificate	Required, Preferred or Not required (HR form).
Face-to-face interview	Required or Not required (HR form). If Required, also enter the venue and arrival instructions.
Interview questions 1–3	Questions Smile asks every candidate (HR form).

Optional fields

Salary or budget range (required only when salary is Disclosed), license details, minimum relevant experience, keywords to look for, related experience that may count, start-date guidance, optional scoring areas (for example Communication quality, Culture fit), up to 3 custom scoring fields, interview questions 4–5, and the advanced **Smile system prompt**.

Interview Type

Choose which AI interview applicants for this role can be sent:

Option	What happens
Voice Interview only	Applicants get an AI phone interview. They book a time and Smile calls them.
Avatar Interview only	Applicants get a Live Avatar video interview, which they start from the email link whenever they are ready.
Both	You choose the phone or the Live Avatar interview for each applicant. If you simply Approve an applicant, the candidate is offered both and chooses one.

"Both" never means the applicant must complete two interviews.

Roles created before this option existed are set to **Both**, so they work as before. You can change the type later on the role page (the **Interview type** card) or with **Edit request**. Changes apply to interviews sent from then on; invitations already sent are not affected. Only HR users can change it, and the change is recorded in the role's **Status History**.

Edit a role

Open the role and select **Edit request**. Change what you need and select **Save role request** (the button stays grey until something has changed). Screening and interview settings can also be updated on the role page in the **Recruitment Setup** section.

The role page

Opening a role shows:

- **Role Request Progress**: where the role is in its workflow.
- **Interview type** card: the role's interview type, with **Save** for HR.
- **Interview automation** card: optionally invite applicants to interview automatically when their screening score meets a minimum (for example 80%). It only applies to applicants screened after you switch it on.
- **Overview** and **Details**: everything entered in the request.
- **Recruitment Setup**: screening and interview settings, including the **Smile Avatar system prompt** used for Live Avatar interviews (with **Restore standard script**).
- **Applicants**: the role's applicants.
- **Status History**: every change, who made it and when.
- **Approve or Reject This Request**: for a request waiting for HR review. Rejecting needs a reason.

Status, closing and removal

See [Section O](#) for every role status. A role stops accepting new applicants and interviews once its **Target Hiring Date** has passed; to keep it open, edit the date. There is no separate archive button: to remove a role you no longer need, select **Delete request** on the role page (this cannot be undone).

F. Applicants

Open **Applicants** to see the **Applicant Pipeline**: every candidate in your organisation.

Search, filters and sorting

- **Search**: candidate name, email, role or application reference.
- **Filters**: role (**All Roles**), stage (**All Stages**), resume status (**Awaiting screening / Screened**), interview type (**Voice Interview, Live Avatar Interview, Not selected**) and interview status (**Not started, Scheduled, In progress, Awaiting review, Review complete**).
- **Sort**: **Newest first, Oldest first** or **Highest match**.
- **Clear all filters** resets everything. The refresh button reloads the list.
- Long lists are split into pages; use the page controls at the bottom.
- **Export to Excel** downloads the list.

New applicants are highlighted until you open them.

Actions on the list

- **View:** open the applicant.
- **Edit:** change the applicant's name, email or mobile number.
- **Delete:** remove the applicant and everything about them.
- Tick several applicants to use **Approve for Interview**, **Send Phone Interview**, **Send Avatar Interview** or **Delete selected**. Applicants who are not eligible (for example, they already have an interview invitation, or their role does not use that interview type) are skipped, and a summary tells you why.

The applicant page

- **Header:** name, application reference, current stage, and the buttons **View Role**, **Role Applicants**, **Edit Applicant** and **Delete Applicant**.
- **Summary:** role, department, date applied, **Interview Type**, **Match Score**, recommendation and **Next Action**.
- **AI Screening Evidence:** Smile's CV analysis (recommendation, summary, strengths, gaps) and the interview evidence once there is one.
- **How AI Graded This Applicant:** the score explained in plain language and every role setting Smile used.
- **HR Decisions:** where you approve or reject (see below).
- **Candidate Status History:** every step, who did it and when. Steps the portal took on its own show as **Automatic update**.
- **Status Tracking:** the four steps (AI CV Analysis, the interview, the interview review, Face-to-Face Interview) and their status.

HR Decisions and notes

Each decision has a **Note** box. A note is optional when approving and required when rejecting (a short reason). Notes are saved in the applicant's history. There is no separate comments area; use the decision notes.

At the resume stage you can:

- **Approve:** invite the candidate to the role's interview type.
- **Send Phone Interview / Send Avatar Interview:** send that interview straight away. Only the buttons allowed by the role's interview type are shown. This works even if the resume has not been screened yet; screening is then skipped and the history says so.
- **Reject:** stop here (reason required).

For a role set to **Both**, until the candidate books or starts, **Change interview type** lets you switch to the other interview. The old link stops working and the candidate gets the new one by email.

After the interview, the **Voice Interview Review** or **Avatar Interview Review** decision moves the candidate to the face-to-face interview (approve) or stops them (reject). After the face-to-face interview, record the **Face-to-Face Interview Decision**.

G. Resume Screening

Open **Resume Screening**. Every resume is screened against the role you choose.

Ways to add resumes

1. **Add Resumes for Screening**: choose a published role, add PDF, DOC or DOCX files (up to 10 MB each, up to the batch limit shown on the page), and start screening.
2. **Choose from Google Drive** (after **Connect Google Drive**).
3. **Choose from OneDrive** (after **Connect OneDrive**, if your organisation has it).
4. **Screen one resume**: a form for a single candidate.
5. **Send an Application Link**: email a candidate a link to apply themselves.

Candidates can also apply directly using the role's application link.

Following progress

Each file shows **Queued** (waiting), **Processing** (being read), **Completed/Screened** (ready to review), **Skipped** (already handled for this role, not charged) or **Failed** (check the file and retry, not charged). Select **View Processed Applicants** when done. **Stop after current batch** stops a long upload.

What the score means

The **Match Score** (0–100%) shows how well the resume fits the role's job description, screening criteria, keywords, experience and license requirement. Smile also gives a recommendation, a summary, strengths and gaps.

The score helps you decide who to look at first. **It is not a decision**. Always read the evidence.

What you can do afterwards

Open the applicant and **Approve**, **Send Phone Interview**, **Send Avatar Interview** or **Reject**. If **Interview automation** is on for the role, applicants who meet the minimum score are invited automatically.

Each successfully screened resume uses **1 credit**. Duplicates and failed files are not charged.

H. Interviews

Voice Interview (AI phone interview)

1. The candidate receives an email with a private booking link.
2. They enter their mobile number and choose a 10-minute time.
3. At that time Smile calls them and asks the role's questions.
4. The transcript and result appear on the applicant page under **Voice Interview Review**.

If the candidate misses the call, use **Send Reschedule Link** on the applicant page to send a fresh booking link.

Cost: 10 credits when completed, 8 when incomplete, 5 when there is no answer.

Live Avatar Interview (AI video interview)

1. The candidate receives an email with a private link (no booking needed).
2. They agree to the privacy notice and recording, then pass a camera and microphone check.
3. Smile appears on video and asks the role's questions in order (up to 20 minutes).
4. The recording, transcript, score and question-by-question review appear on the applicant page under **Live Avatar Review**.

Before your first Live Avatar interview, connect **Google Drive for Live Avatar recordings** in Settings; without it the interview cannot start.

Cost: 2 credits per started minute (up to 40).

Which interview is sent

This follows the role's **Interview Type** ([Section E](#)):

Role setting	Approve sends	Buttons shown
Voice Interview only	Phone interview	Send Phone Interview
Avatar Interview only	Live Avatar interview	Send Avatar Interview
Both	A choice of both (the candidate picks)	Send Phone Interview and Send Avatar Interview

Results

- **Not Scored — Manual HR Review** means too little could be assessed (for example the interview ended early). It is not a rejection: read the transcript and decide.
- If the AI review failed, select **Retry analysis**.
- Recordings are deleted automatically after 90 days; transcripts and reviews are kept.

Face-to-face interview and the Interview Calendar

When you approve the interview review, the candidate receives a link to book a face-to-face interview from your team's free times (from the Google Calendar of the role's chosen interviewer, or the shared HR calendar).

Interview Calendar shows all interviews by month. Select a date to see its **Appointment Records**; select **View Applicant** to open one. Use **Today** to return to the current month. **+ HR Exception Slot** adds an extra face-to-face time when the calendar has none that suits. After the start time, **Mark No Show** records a candidate who did not attend.

I. Credits

Smile Credits pay for the AI work. Your organisation has **one shared balance** that everyone in it uses.

Action	Credits
Resume screening (CV analysis)	1 per resume
Voice Interview	10 completed / 8 incomplete / 5 no answer
Live Avatar Interview	2 per started minute (up to 40)
Creating roles, booking, notes, everything else	Free

When the balance runs out, AI actions are paused until you add credits.

Where to see your balance

- At the top of the menu (on every page).
- **Credits** page → **Credit Balance: Current balance, Total added and Total consumed.**

Credit history

Organization Credit History lists every change: when, the event (for example CV analysis, Voice interview, Purchase, **Promotional Credits**), the change (+ or -), the balance after, the reference and who did it. Search it, or filter by **Credits added / Credits used** and by event type.

Redeem a promo code

1. Open **Credits**.
2. In **Credit Balance**, find **Have a promo code?**
3. Type the code and select **Redeem**.

You will see: **"Promo code applied. 210 credits have been added to your account."** The balance updates immediately, and the history shows **+210 — Promotional Credits** with the code as the reference.

Message	What it means
This promo code is not valid.	Check the spelling. The code may also have been switched off.
This promo code has expired.	The promotion has ended.
This promo code has already been used.	All uses of this code have been taken.
Your organization has already redeemed this promotion.	Each organisation can use a promotion once.

Buy credits

On **Credits**, under **Buy Smile Credits**, choose a pack (or **Need a different amount?** for any number from 1 to 10,000) and pay through the secure checkout. Credits are added as soon as the payment is confirmed.

J. Smile Bot, help and feedback

Open Smile

Select the **smiling blue robot** in the bottom-right corner of any page. A short "Hi! Need help?" greeting appears when you point at it. The robot is a small full-body helper that watches what you do:

- **It explains things as you go.** Tick a box, choose an option, click a button or click into a field and Smile walks over, stands beside it and says a short line about it. For example, ticking **Interview automation** tells you who will be invited automatically once you save. It also says a one-line welcome the first time you open each page in a session, and reacts after some actions, such as redeeming a promo code. It stays quiet when a pop-up window is open.
- **It stays out of your way.** If you stop moving the mouse for about 8 seconds, or the mouse leaves the window, Smile steps off to the right edge of the screen. As soon as you move the mouse again it walks back to where it was. It never blocks the control it is talking about, and it stands still while you point at it.
- **It reacts to you.** Its head follows your cursor, and it reacts when you click it.

Prefer a quiet page? On the **Help & Feedback** tab, untick **Show Smile's tips as I use the portal** and/or **Let Smile move around (it steps aside when I'm idle)**. Select the robot again (or the **X**, or press **Esc**) to close. With a keyboard, press **Tab** until the robot is highlighted, then press **Enter**.

Ask Smile

On the **Ask Smile** tab, type a question (for example "How do I create a role?") and press **Enter**, or select one of the suggested questions. Smile answers from the portal guide. Smile can tell you your credit balance, but cannot see candidate records or make changes.

Help & Feedback

On the **Help & Feedback** tab:

- **Support email:** HRSG, hrsg@mclinkgroup.com.
- **Copy email:** copies the address.
- **Open email app:** starts a new email to support.
- **Show Smile's tips as I use the portal:** untick to stop the spoken tips.
- **Let Smile move around (it steps aside when I'm idle):** untick to keep the robot in its corner and never walk to a control. If tips are on, it still speaks from its corner. Both choices are remembered on your computer.
- **Send feedback:** choose a topic (**Question**, **Report an issue** or **Suggestion**), type your message and select **Continue in email**. Your email app opens with the message filled in. Nothing is sent until you press **Send** in your email app.

When reporting a problem, say which page you were on, what you were trying to do and what you saw.

K. Settings

Settings is shown to users who can change settings (normally all HR users).

Section	What it does
Organization Branding	The organisation name and subtitle shown to your team and candidates.
Shared HR Google Calendar (Google Calendar Connection)	The calendar used for face-to-face interview times and bookings. Needed only if roles use face-to-face interviews.
Google Drive for Live Avatar recordings	Connect your Google account and choose the folder where Live Avatar recordings are saved. Required for Live Avatar interviews. Change folder and Change Google account switch it.
Automated Emails	Edit the wording of the candidate emails: pick an email, change the Subject , Message and Button text , optionally add a Header image , check the preview and select Save Email . Restore Original brings back the standard wording.

Your personal calendar (so you can be chosen as a role's interviewer) is connected from **Profile → My Google Calendar**.

L. Reports and exports

There is no separate Reports page. To get your data:

- **Dashboard → Recruitment Overview:** live counts by stage.

- **Applicants** → **Export to Excel**: the applicant list (with your current filters).
- **Role Requests** → **Export to Excel**: the role list.
- **Credits** → **Organization Credit History**: every credit change.

M. Alerts and notifications

Dashboard alerts (Actionable Alerts)

Alert	What it means	What to do
Applicants not moving	Applicants have had no change for 5+ days.	Review applicants
Missed call interviews	Phone interviews scheduled in the past have no result.	Open Interview Calendar
Credits low or used up	AI actions may stop soon or have stopped.	Top up credits (or redeem a promo code)
The HR Google Calendar needs to be reconnected	The calendar connection has expired.	Reconnect calendar
No HR Google Calendar is connected	Needed for face-to-face interviews.	Connect calendar
Resumes could not be screened	Some files failed.	Review resume screening
Emails not delivered	Candidate emails failed to send.	Review applicants and check the email addresses
Approved roles not published	Approved roles waiting more than ~3 days.	Review role requests
Live Avatar interviews can't start: recording storage is not set up	No Google Drive folder is connected.	Set up recording storage

Each alert disappears by itself once the problem is fixed.

Other notifications

- **The bell** and the **Applicants** badge: new applicants since you last looked. Opening an applicant marks it as seen.
- **Credit meter** in the menu turns amber when low and red when empty.
- **Emails to candidates** go out automatically for interview invitations, confirmations and face-to-face bookings. The organisation owner receives a "new role posted" email when a role is published.

N. Common tasks

Create a role

1. **Role Requests** → **Create Role Request**.
2. Upload or paste the job description, then **Generate draft**.
3. Check the fields, choose the **Interview Type**, then **Create role**.

Add an applicant

- Share the role's application link (on the role page), **or**
- **Resume Screening** → **Add Resumes for Screening**: choose the role, add files, start screening, **or**
- **Resume Screening** → **Screen one resume**, **or**
- **Resume Screening** → **Send an Application Link** to email the candidate.

Screen an applicant Resumes are screened automatically when added. Open **Applicants**, filter **Awaiting screening** / **Screened**, select **View**, read the AI Screening Evidence and **Match Score**.

Send a voice interview Open the applicant → **HR Decisions** → **Send Phone Interview** → confirm. (Or **Approve** if the role is Voice Interview only.)

Send an avatar interview Open the applicant → **HR Decisions** → **Send Avatar Interview** → confirm. (Or **Approve** if the role is Avatar Interview only.) Make sure Live Avatar recording storage is set up in Settings.

Change a role's interview type Open the role → **Interview type** card → choose an option → **Save**.

Redeem a promo code **Credits** → **Have a promo code?** → type the code → **Redeem**.

Check credits Look at the top of the menu, or open **Credits** for the balance and history.

Contact support Select the Smile robot → **Help & Feedback** → **Copy email** or **Open email app**, or write to hrsg@mclinkgroup.com.

Reject an applicant Open the applicant → type a short reason in **Note** → **Reject**.

Invite a teammate (owner) **User Accounts** → **Invite a teammate** → enter their email. They join when they register with that email.

O. Status reference

Role statuses

Status	Meaning
Draft	Still being prepared; not submitted.

Status	Meaning
Pending HR Discussion	Waiting for HR to review.
Pending Management Approval	Waiting for a management decision (older or special setups).
Returned for Revision / On Hold	Older statuses; these requests can still be approved or rejected.
Approved	Approved; setup can be completed.
Recruitment Setup	HR is preparing screening and interview details.
Job Posted	Open for candidates.
Rejected	Will not go ahead; see the comments.

Applicant stages

Stage	Meaning
Resume Review	Waiting for your decision on the resume.
Resume Approved	Approved; the interview invitation is being sent.
Interview Choice Pending	Invited; the candidate has not yet chosen a call or Live Avatar interview.
Voice Interview Booking Pending	The candidate can book a call time.
Voice Interview Scheduled	A call time is booked.
Voice Interview Review	The call result is ready for you.
Live Avatar Interview Pending	Waiting for the candidate to start the video interview.
Live Avatar Review	The video interview result is ready for you.
Approved for Face-to-Face Interview	The candidate can book a face-to-face time.
Face-to-Face Interview Scheduled	A face-to-face time is booked.
Passed Face-to-Face Interview	Passed the final step.
Rejected	Will not move forward.

Resume screening statuses

Queued · Processing · Completed / Screened · Skipped (HR skipped or duplicate; not charged) · Failed (not charged; retry).

Live Avatar score bands

Strong (75+) · Good (55–74) · Partial (35–54) · Limited (under 35) · Not Scored — Manual HR Review (too little to score; not a rejection).

P. End-to-end workflow

1. **Create the role.** Role Requests → Create Role Request. Generate the draft from the job description and check it.
2. **Choose the interview type.** Voice Interview only, Avatar Interview only, or Both. Then **Create role**.
3. **Check you are ready.** Credits available; Google Drive recording storage connected (for Live Avatar); Google Calendar connected (for face-to-face).
4. **Add applicants.** Share the application link or upload resumes in Resume Screening.
5. **Smile screens each resume.** Watch the progress, then open **Applicants**.
6. **Review applicants.** Sort by **Highest match**, open each one, read the evidence.
7. **Send the interview. Approve**, or **Send Phone Interview** / **Send Avatar Interview**. Reject those who are not a fit, with a reason.
8. **The candidate does the AI interview.** They book a call or start the video interview from their email.
9. **Review the result.** Read the transcript, score and evidence, then approve or reject in **Voice Interview Review** / **Avatar Interview Review**.
10. **Face-to-face interview.** The approved candidate books a time; it appears in the **Interview Calendar**.
11. **Final decision.** Record the **Face-to-Face Interview Decision**.

Q. Button and action reference

Button	Where	What it does	Who can use it
Create Role Request	Dashboard, Role Requests	Starts a new role.	HR Users, Role Requesters
Generate draft / Generate AI questions	Role form	Fills the form from the job description.	Anyone creating a role
Create role	Role form (HR)	Saves, approves and publishes the role.	HR Users
Save as draft	Role form (HR)	Saves without publishing.	HR Users
Submit for HR approval	Role form (requesters)	Sends the request to HR.	Role Requesters
Save role request	Edit role	Saves changes.	HR Users, the requester
Edit request / Delete request	Role page	Edit or permanently delete the role.	HR Users, the requester
Save (Interview type)	Role page	Changes the role's interview type.	HR Users
Save (Interview automation)	Role page	Turns automatic interview invitations on or off.	HR Users

Button	Where	What it does	Who can use it
Approve or Reject This Request	Role page	Decides a submitted role request.	HR Users, Management
Export to Excel	Role Requests, Applicants	Downloads the list.	Anyone who can see the list
View / Edit / Delete	Applicants list	Open, edit or remove an applicant.	HR Users
Approve for Interview	Applicants list (selected)	Approves several applicants.	HR Users
Send Phone Interview	Applicants list, applicant page	Sends the AI phone interview. Shown only if the role allows it.	HR Users
Send Avatar Interview	Applicants list, applicant page	Sends the Live Avatar interview. Shown only if the role allows it.	HR Users
Approve / Reject	Applicant page, HR Decisions	Records your decision (reason needed to reject).	HR Users
Switch to Phone / Avatar Interview	Applicant page (roles set to Both)	Replaces an unused invitation with the other type.	HR Users
Send Reschedule Link	Applicant page	Sends a new call booking link after a missed call.	HR Users
Retry analysis	Applicant page (Live Avatar)	Re-runs the AI review.	HR Users
Edit Applicant / Delete Applicant	Applicant page	Edit or remove the applicant.	HR Users
Add Resumes for Screening	Resume Screening	Bulk upload for one role.	HR Users
Connect / Choose from Google Drive	Resume Screening	Import resumes from Google Drive.	HR Users
Connect / Choose from OneDrive	Resume Screening	Import resumes from OneDrive.	HR Users
View Processed Applicants	Resume Screening	Opens the screened applicants.	HR Users
Send an Application Link	Resume Screening	Emails a candidate a link to apply.	HR Users
+ HR Exception Slot	Interview Calendar	Adds an extra face-to-face time.	HR Users
Mark No Show	Interview Calendar	Records a candidate who did not attend.	HR Users
Redeem	Credits	Applies a promo code (+210 credits).	Everyone in the organisation

Button	Where	What it does	Who can use it
Buy Smile Credits	Credits	Buys a credit pack.	Everyone in the organisation
Smile robot	Every page	Opens Smile Bot.	Everyone
Copy email / Open email app / Continue in email	Smile → Help & Feedback	Contact the support team.	Everyone
